

## Technical Specification

### Headlines

- Normally, Pavilion Theatre supplies 1 technician to assist but not to operate shows. Please check your contract.
- Please contact the Technical Director well in advance to arrange crew and lighting/sound operators.
- No fixing or screwing to stage floor.
- Lighting focus is normally from Genie GR20 Runabout. If using the tallescope you will need three people minimum for the focus. Max platform height for tallescope is 4.2 metres so you may have to trim bars below max height to use scope.
- There is an allowance for a maximum of two touring company vehicles to be parked at the rear of the venue for loading and unloading.
- Curfew for vehicles at the rear of the venue is 23:30. After this time get outs must continue via the front of the building.

### Lighting Control

ETC ION with 2 x 20 fader wing with 2 touch screens and an IPAD for riggers remote – 1024 channels.

138 Robert Juliat Tivoli Dimmer and 12 Zero 88 dimmers

Desk DMX outs 1 & 2 connected to separate buffers downstage right for universe 1 and 2.

### Lanterns Stock - Please check with theatre for current availability.
